

ELSHAFEI MOHAMED ELGHARIB

SOFTWARE DEVELOPER | FULL-STACK / FRONTEND ENGINEER

Mansoura, Egypt | +20 155 440 7038 | elshafeibusniss2005@gmail.com
GitHub: github.com/Elshafei-Mohamed | LinkedIn: linkedin.com/in/Elshafei-Mohamed

PROFESSIONAL SUMMARY

Passionate Software Developer and Computer Science student specializing in Web Engineering. Experienced in building responsive, scalable, and high-performance web applications using modern JavaScript/TypeScript frameworks (React), Node.js, and .NET (C#). Proven track record of delivering end-to-end features, optimizing frontend performance by up to 45%, and architecting robust software solutions. Strong foundation in software architecture, clean code principles, and data structures.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, C#, Python, HTML5, CSS3, SQL
Frontend:	React.js, Tailwind CSS, Bootstrap, Framer Motion, SASS/SCSS, DOM Manipulation, Responsive Web Design
Backend & DB:	.NET Core, Node.js, Express.js, RESTful APIs, MySQL, Supabase, PostgreSQL
Tools & Methods:	Git, GitHub, Vercel, VS Code, Agile Development, Clean Architecture, CI/CD Fundamentals

FEATURED PROJECTS

Apexa-For-Coding – Interactive Coding & Learning Platform 2024

Tech Stack: HTML5, CSS3, JavaScript (ES6+), Bootstrap, PHP/MySQL

- Architected an interactive e-learning platform supporting 250+ active users with real-time code execution interfaces.
- Accelerated initial page loading times by 45% through aggressive asset optimization and code splitting.
- Implemented secure user authentication and dynamic dashboard management, reducing login failure rates by 80%.

Pawstore – Modern E-Commerce Marketplace 2024

Tech Stack: React.js, JavaScript, Tailwind CSS, REST APIs, Vercel

- Engineered a fully responsive e-commerce platform managing 75+ dynamic product catalogs and shopping cart state.
- Optimized search and filtering performance, boosting search-to-purchase conversion rates by 50%.
- Integrated responsive layout systems and UI animations, decreasing cart abandonment rates by 28%.

Muscle Factory – Fitness & Workout Management Application 2024

Tech Stack: HTML5, Advanced CSS, JavaScript DOM, Framer Motion, PWA

- Launched a fitness management web application serving 180+ active users with interactive workout scheduling.
- Achieved a 92/100 Google PageSpeed score through lightweight component design and deferred script execution.
- Pioneered Progressive Web App (PWA) features enabling offline access and increasing mobile engagement by 25%.

Grill-House – Digital Restaurant & Reservation System 2024

Tech Stack: HTML5, CSS3, JavaScript DOM, Vercel Deployment

- Built a high-converting digital storefront and reservation engine resulting in a 35% increase in online bookings.
- Implemented mobile-first responsive architecture ensuring seamless experience across all screen sizes.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science – Software Engineering 2023 – 2028

Faculty of Computer Science & Information Technology | GPA: 3.7 / 4.0

- Core Focus: Software Engineering, Data Structures & Algorithms, Database Systems, Modern Web Technologies.

DEPI Full-Stack Web Development Certificate Digital Egypt Pioneers Initiative

- Completed intensive 240+ hours hands-on software development training, ranking in the top 10% of participants.

GDSC Frontend Development Certificate Google Developer Student Clubs

- Certified in core modern web technologies: HTML5, CSS3, JavaScript (ES6+), and modern frontend workflows.

ITIDA GIGS & Mahara-Tech Specialized Certificates ITIDA / Mahara-Tech

- Professional training in freelance tech readiness, web architecture, and modern IT skills.

LANGUAGES

Arabic: Native / Mother Tongue

English: Professional Working Proficiency (Completed 2 English Proficiency Levels - Mansoura University)
